# The Department of Global Business

## Diploma Policy (DP)

Based on the Spirit of the Founding of our University, this department will nurture students who are capable of contributing to global society. Moreover, our students will possess a global perspective, systematically understand business administration, and learn about the creation and effective management of management resources. By developing broad and deep intellect, improving students' command of English (with focus on English), Chinese, and Japanese, respecting different cultures and sharing world values, talented and capable human resources who can participate actively domestically in Japan or overseas will be produced. After acquiring knowledge about economics, business administration, and other business related subjects, human resources who are capable of finding strategic solutions to problems and also have acquired thinking skills and methodology to put their solutions into action will be nurtured.

### DP1 Knowledge and Specialization

### **Abilities to Express Oneself**

Ability to effectively use English, Chinese, and Japanese to formulate one's opinion in a clear, logical style or express it in an easy-to-understand manner.

### **Abilities to Listen Closely, Teamwork, and Leadership**

Ability to strive to achieve goals by cooperating with others through dialogues based on "attentive listening," "empathy," and "realization".

## **Curriculum Policy (CP)**

Based on the Diploma Policy, the Department's curriculum is organized so students will be able to gain expertise vital for conducting business in English. Moreover, students can learn various ways of thinking and methodologies efficiently and in a systematic way to act from a global perspective at all times.

- ◆ In the first year, mainly based on the "Musashino Initial" program, Musashino University's liberal education system which provides a basic, common platform for implementing its university-wide education policy, students acquire basic scholastic abilities to study their major subjects. At the same time, it also includes introductory subjects, will provide the basis for completing specialized subjects within the Department. Regarding language skills, students in their first year will also start taking English, Chinese, and Japanese courses in order to acquire the language skills necessary for conducting global business at a practical level.
- ◆ The curriculum for the second year consists of Global Studies, which is a requirement for all departments of the Faculty, and specialized courses of the department, which are introductory level and required. In particular, Global Studies is linked with Global Projects in the third year. In this research-based course of study, Japanese students and students from overseas form teams of mixed nationalities to work on research assignments. Thereby developing the ability to understand different cultures and acquiring communication and language use skills.
- ◆ The curriculum for the third year and thereafter consists of subjects in which students identify issues to be addressed, build up and verify hypotheses, find solutions to the issues, and compile the results from research for their graduation thesis under the close guidance of their academic advisor. Students select their specialized subjects through consultation with their academic advisor or a group of teachers taking their career plans into consideration. The greatest characteristic of specialized subjects is that many of the teachers have a wealth of practical business experience and incorporate ways of thinking and methodologies based on such experience into their lessons.

## **CP1 Knowledge and Specialization**

### **Liberal Education and Fundamental Scholastic Abilities**

Prior to taking classes in the areas of specialization in one's major, students will enroll in "Musashino Initial", which constitutes a liberal arts education program for students in all the departments at the university. The aim of "Musashino Initial" is to provide the students with the basic technique and knowledge necessary for college learning. Toward this goal, the students will take classes in, 1) Buddhist Studies, 2) Health and Physical Education, 3) Smart Intelligence Computing, 4) Creating Happiness Program (CHP), 5) Field Studies, and so on.

### **Specialized Abilities**

The curriculum is organized so that by studying specialized subjects in Global Business in English, in addition to technical knowledge, students will develop their practical English skills which can be utilized in real situations in the global business setting. Specialized subjects offered include management, trade, finance, and accounting.

## **CP2 Interest, Attitude, and Character**

In order to develop the ability to conduct business from a global perspective, specialized subjects and seminars combine academic research and practical experience in global business to offer a curriculum that consists of classes covering diverse ways of thinking and methodologies based on practical business experience.

## **CP3 Thinking and Judgment**

The curriculum is organized so that students can complete all required subjects by the time they graduate by interrelating global communication skills and the ability to utilize several languages, identify and solve problems with business and management expertise. In particular, students acquire the ability to identify issues independently on their own initiative and develop and verify hypotheses based on the ways of thinking and methodologies they learn mainly through seminars. Furthermore, they acquire the ability to take the initiative to propose several solutions to issues from the viewpoint of a global society and organization as a whole based on strategic thinking. Seminars in different fields of expertise provide opportunities to learn common social issues from several perspectives in order to allow students to experience the effectiveness of interdisciplinary approaches to the identification of issues and their solution. In addition, students from different seminars master the ability to manage carrying out tasks in a systematic way through collaboration among them. In the curriculum, graduation theses are viewed as the consummation of learning in the Department.

## **CP4 Practical Skills and Expressions**

The curriculum is organized so that the English ability level of individual students is raised to the maximum extent by understanding their ability level prior to the start of the first year, and also by organizing classes according to the different levels of English ability. The English ability level of students is assessed as required through external examinations such as TOEIC and IELTS. The curriculum is also designed so that students can reach a level at which they can use Chinese or Japanese at a practical level depending on what their native language is.
